

Karl Fischer Moisture Titrator [Volumetric titration]

MKV-71 SERIES

Karl Fischer Moisture Titrator [Coulometric titration]

Option: Additional Burette KF (10mL)

MKC-710M

# SUMMARY

Option: Additional Burette KF (10mL)

4-channel multi connection/ High extensibility

Karl Fischer Moisture Titrator [Volumetric titration]

Midrange model

Karl Fischer Moisture Titrator [Volumetric titration]

Entry model

Karl Fischer Moisture Titrator [Volumetric titration]

Option: Additional Burette KF (10mL)

Standard: MS-710VP Magnetic Stirrer /
Automatic Solvent Change Unit

4-channel multi connection/ High extensibility

Karl Fischer Moisture Titrator [Coulometric titration]

Midrange model

Karl Fischer Moisture Titrator [Coulometric titration]

### Entry model

Karl Fischer Moisture Titrator [Coulometric titration]

## **FEATURE**

Wireless connection between operation unit, touch panel, and titration unit/ Simultaneous measurement with up to 4 titration units

MKV-710M MKC-710M

By the use of wireless adapters (Bluetooth®, Commercialized product), the operation unit and the titration unit can be used together without being connected to each other with a cable. You can carry out titration of a sample, which emits poisonous gas, safely by keeping the titration unit inside a draft chamber while keeping the operation unit outside of it. You may place the operation unit on the opposite side of aisle or hold it with your hand by connecting a battery (Commercialized product) to it for operation. Attaching a monitor arm to the main control unit allows for flexibility of its mounting position. (The arm mount of the display is compliant with VESA standard 75mm x 75mm.)

#### New-type burette unit

MKV-710M MKV-710S MKV-710B

The burette unit has the switching valve on top of the cylinder. The structure reduces dead space in the tube between the cylinder and the switching valve. In addition to the reduction of dead space in the cylinder, the structure reduces amount of residual titrant to ease replacement of titrant.

Option : Reagent Bottle

#### Maximum electrolysis speed 2.6mgH2O/min

MKC-710M MKC-710S

Our unique technology enables maximum electrolysis speed of 2.6mgH2O/min. It reduces pre-titration time and measurement time.

# DPTION

#### Evaporator ADP-611

This unit vaporizes water content of solid samples, which is unable to be put directly into the titration cell, by heating them.

The vaporized moisture is bubbled into the titration cell to be measured.

#### Evaporator for Oil Sample ADP-513

This unit is used to measure water content of lubricant oil, grease, tar products, paints and other viscous liquids. (NON-CE)

#### Heat Extractor for Sugar Samples ADP-344

This unit extracts water content of a sample in the dehydration solvent by heating the titration cell of Volumetric Karl Fischer Moisture Titrator. This unit is used to measure the water content of chocolates, caramels and other sugar samples. (NON-CE)

#### Multiple Sample Changer CHK-501

This unit is an evaporator for continuous measurement of multi samples (24 samples).

Heating temperature can be set for each sample, thus, different kinds of sample are able to be set at once. (NON-CE)

#### Evaporator for Ores ADP-512

This unit vaporizes adherent water and combined water of iron ores, manganese ores, clay, and other inorganic compounds by heating them.
(NON-CE)

#### Evaporator for High Temperature ADP-512S

This unit has heating capacity up to 1000°C and is used to measure combined water, etc. (NON-CE)

# SPECIFICATION MKY-71 [Nolumetric titration]

Specification		Contents			
Туре	Karl Fischer Moisture Titrator				
Model	MKV-710M	MKV-710S	MKV-710B		
Product configuration	MCU-710M+MKV-710+IDP-100+	MCU-710S+MKV-710+IDP-100+	MKV-710+IDP-100+Automatic Solvent		
	Automatic Solvent Change Unit	Automatic Solvent Change Unit	Change Unit		
Measuring method	Karl Fischer Volumetric titration				
Measuring range	1) Water content : 0.1 to 500mgH2O (depends on KF reagent factor)				
	2) Concentration : 10ppm to 100%H2O				
Burette precision	Volume : 10mL burette				
	Discharge precision: ±0.015mL Repeatability: ±0.005mL				
Endpoint detection	By polarized potential level detected with				
EP sense method					
EP sense method	Detection of potential level maintained du	iring preset end time			
T1 11 C	End time range : 1 to 99s				
Titration form	Normal titration / Back titration (Option additional burette required)				
Required solvent	30 to100mL (in S-type titration vessel)				
Method	120	20			
Key operation	Touch panel		Sheet key		
Displays	1) 8.4-inch color LCD 800 × 600 dots		1) White LED-backlit LCD		
	2) English / Japanese / Mandarin Chinese / Korean / Russian / Spanish /		2) English / Japanese / Mandarin Chine
